032 \$ Antshares was founded by Da Hongfei and Erik Zhang through Da Hongfeis development company Onchain.. Children)you might wish to pull jb44swddsh 90b0ccbb write-up Corporations with septwolves, fuguiniao, tries joeone.. ” The selected bookkeepers reach a consensus with each other and generate new blocks that are attached to the blockchain.. •••••

•••• The consensus mechanism of NEO is delegated Byzantine Fault Tolerance (dBFT), this means that every token holder can vote upon “bookkeepers.. GAS is the asset that powers the blockchain For every transaction, smart contract execution or performing of other tasks users have to pay fees in GAS.. They want to provide a platform where smart contracts can be used efficiently and in a safe environment.. It uses PoS as consensus mechanism The asset can be staked to get the second token GAS as a staking reward.. ” They work very closely with regulators and try to develop everything in compliance with laws and regulations..
